

.NET on Ubuntu — October 2025

Package download statistics for the dotnet/backports PPA on Launchpad.

Reporting period	October 2025 (2025-10-01 to 2025-10-31, UTC)
Data window	2024-04-26 to 2026-07-31
Generated	2026-08-03 00:40:36 UTC
Origin	Backports PPA
Scope	dotnet6, dotnet7, dotnet8, dotnet9, dotnet10 · all Ubuntu series and architectures · debug-symbol packages excluded

At a glance

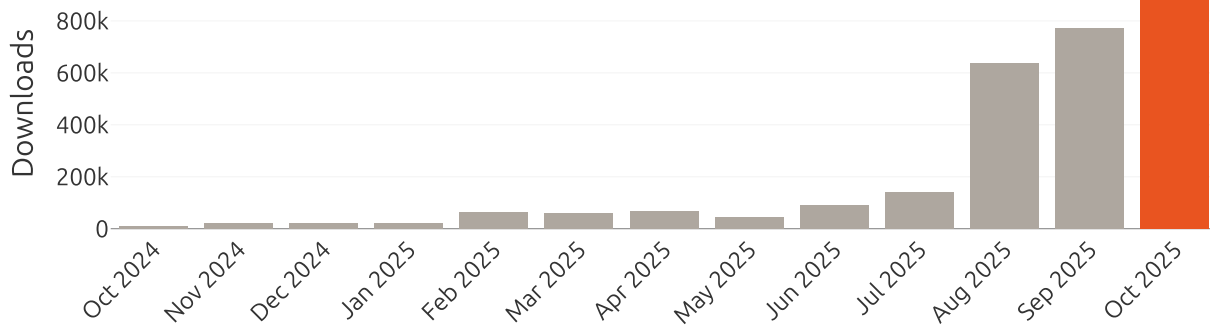

Headline volume and the month's most material movements.

Downloads in month 916,796 vs September 2025: +18.6%	Average per day 29,574 over 31 days with data	Year on year 86× vs October 2024 (10,606)	Peak day 53,902 2025-10-16
Leading version dotnet9 92.4% of the month · 4 active versions	Newest version share 92.4% dotnet9 · +2.2pp	SDK per runtime download 0.59 developer-intent proxy · +8.4%	Lifetime to month end 2,890,379 cumulative since 2024-04-26

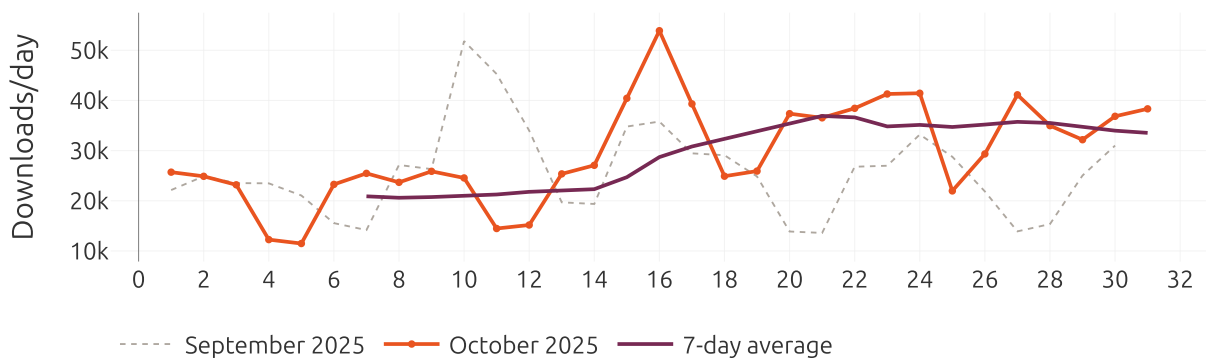

Key findings

916,796 downloads in October 2025 (29,574/day), up +18.6% against September 2025. Year on year the month is 86× higher than October 2024.
Every runtime-only download came with 0.59 SDK downloads (130,994 SDK vs 223,643 runtime) — a proxy for developer-side rather than deployment-side pull.
arm64 is now 14.1% of downloads (-3.2pp on September 2025).
Linear extrapolation of the last 60 days projects roughly 1,066,708 downloads in November 2025 (+16.4% on October 2025).

Monthly downloads, last 13 months

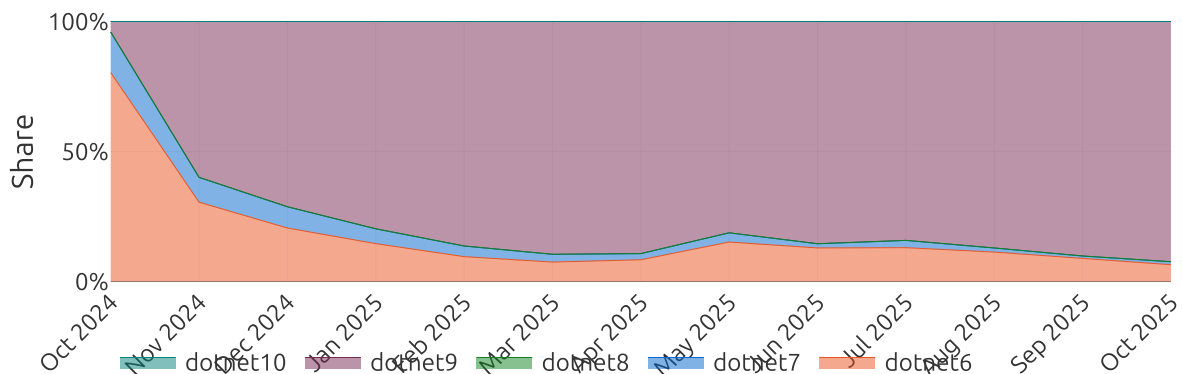

Daily downloads through the month (day of month on x axis)

Composition & adoption

Which .NET releases, Ubuntu series and architectures the downloads came from, and how the mix moved.

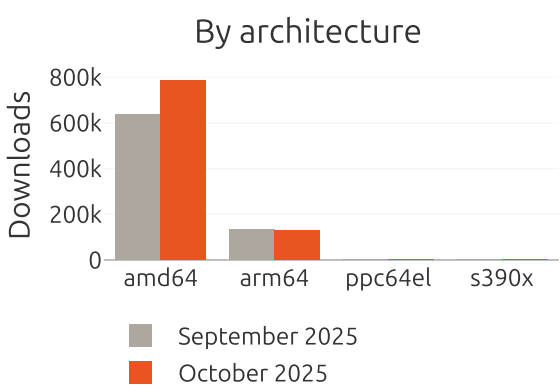

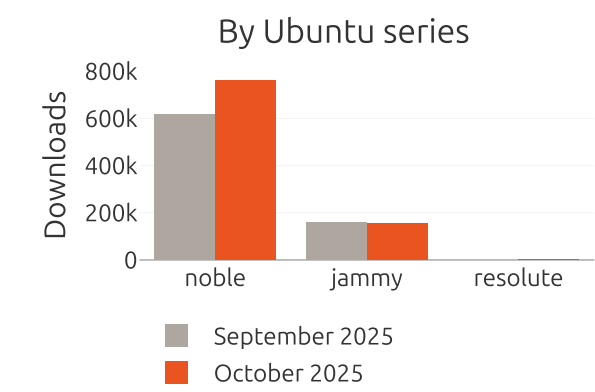

Share of downloads by .NET version

Version detail

VERSION	DOWNLOADS	SHARE	MOM	SHARE CHANGE
dotnet9	847,156	92.4%	+21.5%	+2.2pp
dotnet6	59,102	6.4%	-11.6%	-2.2pp
dotnet7	10,520	1.1%	+18.9%	+0.0pp
dotnet8	18	0.0%	n/a	+0.0pp

Share change is in percentage points against September 2025.

Ubuntu series detail

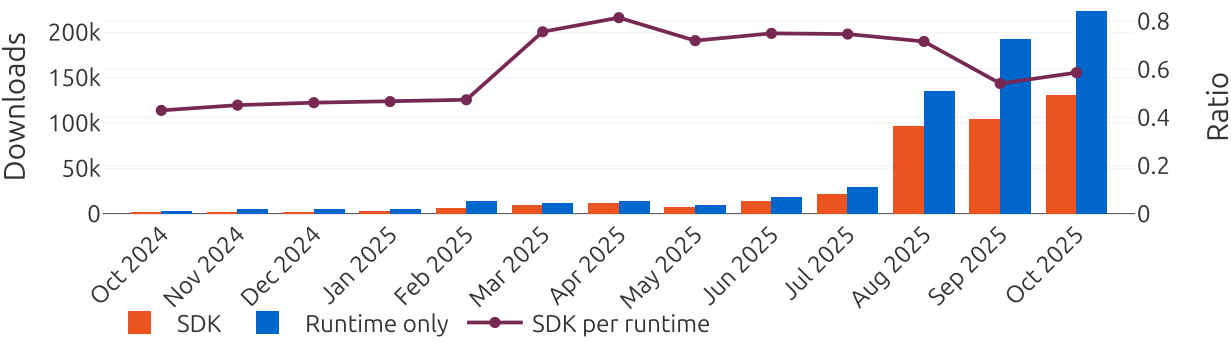

VALUE	DOWNLOADS	SHARE	SEPTEMBER 2025	MOM
noble	762,979	83.2%	615,535	+24.0%
jammy	153,773	16.8%	157,317	-2.3%
resolute	44	0.0%	0	n/a

LTS series (jammy (22.04 LTS), noble (24.04 LTS)) account for 100.0% of the month, -0.0pp on September 2025.

Architecture detail

VALUE	DOWNLOADS	SHARE	SEPTEMBER 2025	MOM
amd64	787,738	85.9%	639,003	+23.3%
arm64	128,864	14.1%	133,712	-3.6%
ppc64el	102	0.0%	78	+30.8%
s390x	92	0.0%	59	+55.9%

Developer intent: SDK versus runtime-only downloads

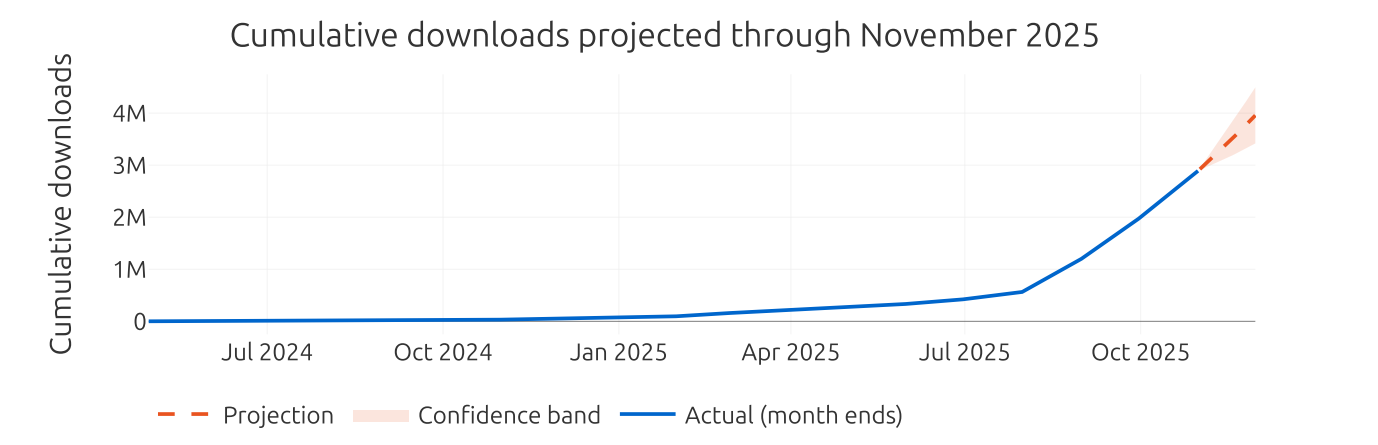

Top packages this month

PACKAGE	TYPE	DOWNLOADS	MOM
dotnet-runtime-9.0	runtime	101,582	+16.2%
dotnet-host-9.0	host	101,209	+16.2%
dotnet-hostfxr-9.0	hostfxr	101,077	+16.2%
aspnetcore-runtime-9.0	aspnetcore-runtime	99,595	+16.4%
aspnetcore-targeting-pack-9.0	targeting-pack	63,199	+23.9%
dotnet-apphost-pack-9.0	apphost-pack	63,190	+24.0%
dotnet-targeting-pack-9.0	targeting-pack	63,051	+23.9%
netstandard-targeting-pack-2.1-9.0	targeting-pack	62,308	+25.8%
dotnet-sdk-9.0	sdk	62,196	+25.7%
dotnet-templates-9.0	other	61,298	+24.5%

SDK downloads indicate development and build environments; runtime-only downloads indicate deployment targets. Neither is a count of people.

Trajectory & watch items

Where the trend is heading, and what needs a human explanation.

Projection fits the daily rate of the 60 days to 2025-10-31 and extrapolates linearly; it assumes no new release events. Indicative total for November 2025: 1,066,708 downloads.

Momentum by version

VERSION	DOWNLOADS IN MONTH	LAST 7D VS PRIOR 7D	LAST 30D VS PRIOR 30D	TREND (DL/DAY²)	EST. HALF-LIFE
dotnet6	59,102	-2.2%	-15.3%	4.7	374 days
dotnet7	10,520	-9.8%	+14.4%	-0.3	growing / stable
dotnet8	18	-100.0%	n/a	0.0	growing / stable
dotnet9	847,156	-4.6%	+17.6%	652.9	growing / stable

Windows end on 2025-10-31. Days without data are treated as zero inside these windows, so a collection gap depresses the figures.

Days needing explanation

DATE	DOWNLOADS	ABOVE MONTH MEAN
2025-10-16	53,902	2.5σ

Days more than two standard deviations above the month's mean. Common causes are release publications, mirror synchronisation and CI bursts.

Data coverage

MEASURE	VALUE
Days in month	31
Days expected in window	31
Days with download counts	31
Coverage	100.0%
Missing days	0
Gaps	none
Month fully elapsed in dataset	yes
Publications active in month	285
Publications first seen in month	136
Collector last run	2026-07-31

A publication is one binary package version in one series and architecture. A burst of first-seen publications usually follows a release upload or a resumed collection window, not a change in demand.

Methodology & limitations

Figures count package downloads recorded by Launchpad for the dotnet/backports PPA only.

The primary Ubuntu archive publishes no download telemetry, so packages installed from it are not represented here. This report is a directional indicator, not total .NET usage on Ubuntu.

Downloads are not users. CI/CD pipelines, container image builds, mirrors and repeated installations all inflate counts, and one developer may generate many downloads.

Counts are deduplicated per publication and day, keeping the maximum value reported by Launchpad; recent days may still rise as Launchpad reporting settles.

Debug-symbol packages are excluded from every figure in this report.

No data is collected for any other programming language, so this report makes no cross-language comparison.

Source: Launchpad download counts for Backports PPA. Collected by scripts/collect.py; figures reproducible from data/downloads.json for month 2025-10.
