

.NET on Ubuntu — September 2025

Package download statistics for the dotnet/backports PPA on Launchpad.

Reporting period	September 2025 (2025-09-01 to 2025-09-30, UTC)
Data window	2024-04-26 to 2026-07-31
Generated	2026-08-03 00:40:33 UTC
Origin	Backports PPA
Scope	dotnet6, dotnet7, dotnet8, dotnet9, dotnet10 · all Ubuntu series and architectures · debug-symbol packages excluded

At a glance

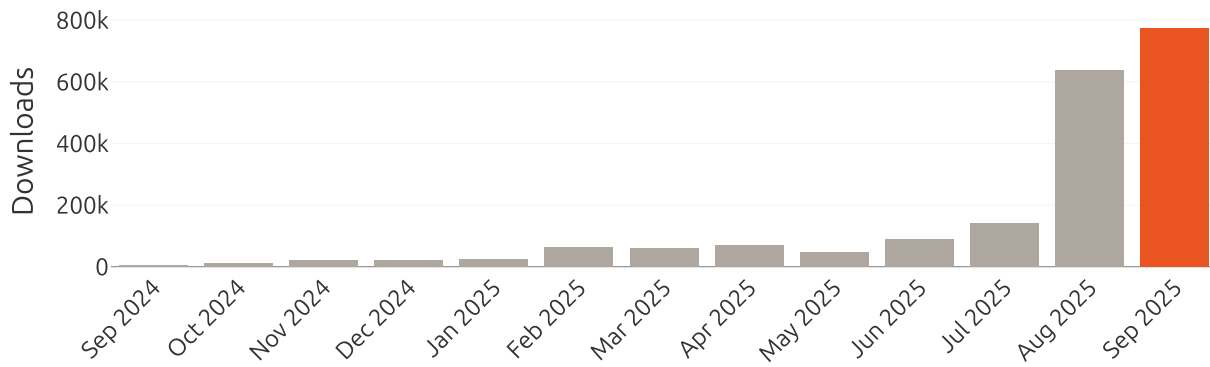

Headline volume and the month's most material movements.

Downloads in month 772,852 vs August 2025: +21.4%	Average per day 25,762 over 30 days with data	Year on year 202× vs September 2024 (3,825)	Peak day 51,831 2025-09-10
Leading version dotnet9 90.2% of the month · 3 active versions	Newest version share 90.2% dotnet9 · +3.1pp	SDK per runtime download 0.54 developer-intent proxy · -24.5%	Lifetime to month end 1,973,583 cumulative since 2024-04-26

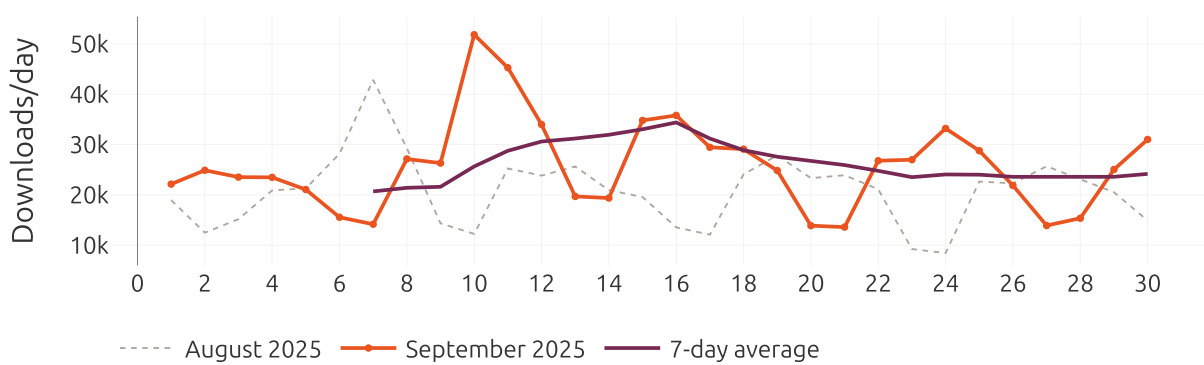

Key findings

772,852 downloads in September 2025 (25,762/day), up +21.4% against August 2025. Year on year the month is 202× higher than September 2024.
Adoption of dotnet9 is accelerating: 90.2% of the month's volume, +3.1pp on August 2025 (+25.7% in absolute terms).
Every runtime-only download came with 0.54 SDK downloads (103,884 SDK vs 192,291 runtime), -24.5% on August 2025 — the mix shifted towards deployment targets.
arm64 is now 17.3% of downloads (+12.0pp on August 2025).
Linear extrapolation of the last 60 days projects roughly 865,155 downloads in October 2025 (+11.9% on September 2025).

Monthly downloads, last 13 months

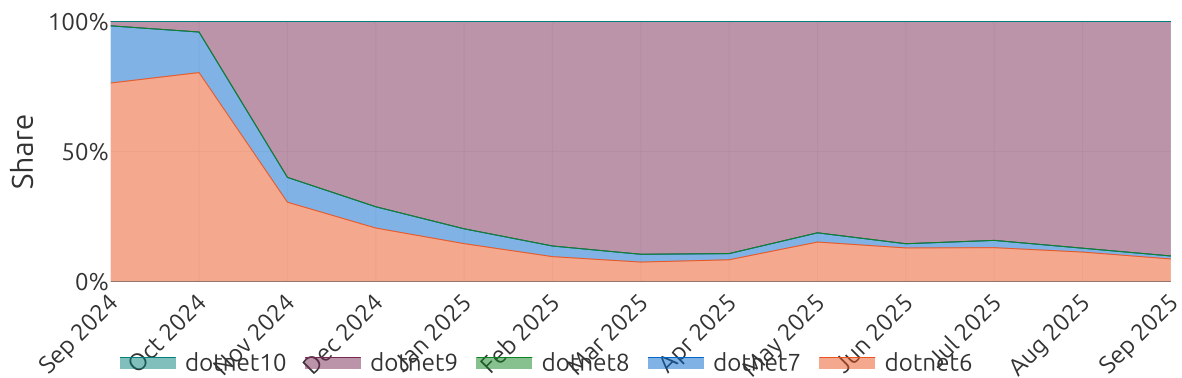

Daily downloads through the month (day of month on x axis)

Composition & adoption

Which .NET releases, Ubuntu series and architectures the downloads came from, and how the mix moved.

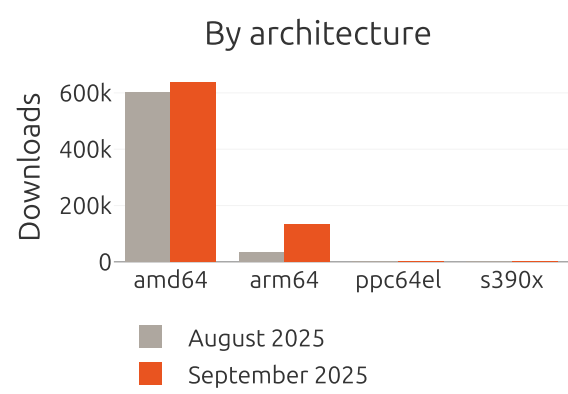

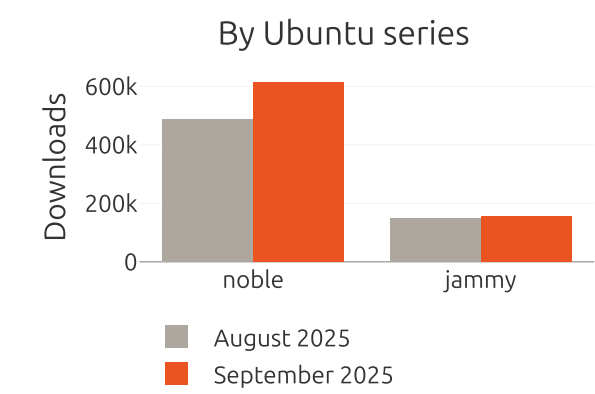

Share of downloads by .NET version

Version detail

VERSION	DOWNLOADS	SHARE	MOM	SHARE CHANGE
dotnet9	697,114	90.2%	+25.7%	+3.1pp
dotnet6	66,892	8.7%	-7.1%	-2.7pp
dotnet7	8,846	1.1%	-11.8%	-0.4pp

Share change is in percentage points against August 2025.

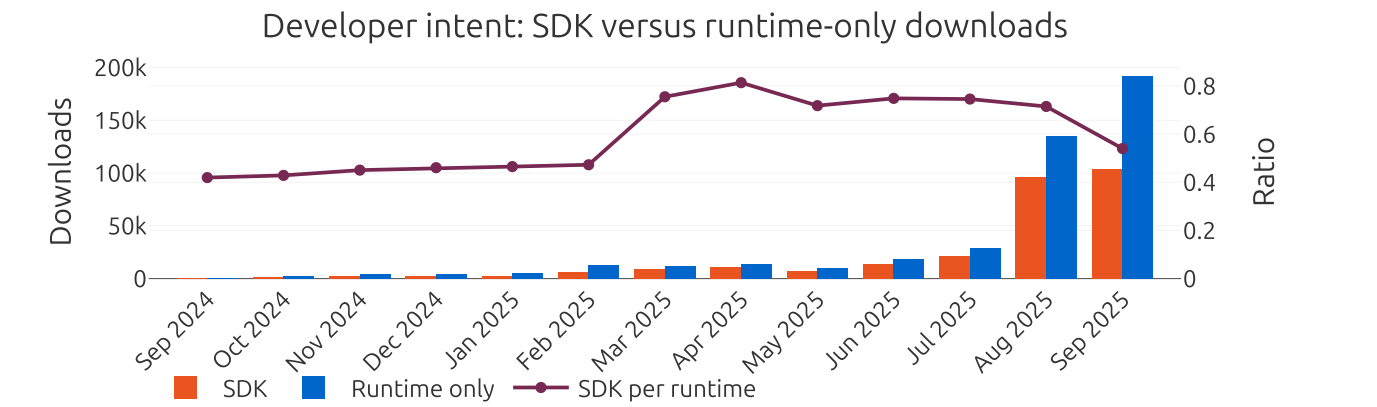

Ubuntu series detail

VALUE	DOWNLOADS	SHARE	AUGUST 2025	MOM
noble	615,535	79.6%	489,060	+25.9%
jammy	157,317	20.4%	147,718	+6.5%

LTS series (jammy (22.04 LTS), noble (24.04 LTS)) account for 100.0% of the month, +0.0pp on August 2025.

Architecture detail

VALUE	DOWNLOADS	SHARE	AUGUST 2025	MOM
amd64	639,003	82.7%	602,795	+6.0%
arm64	133,712	17.3%	33,878	+294.7%
ppc64el	78	0.0%	68	+14.7%
s390x	59	0.0%	37	+59.5%

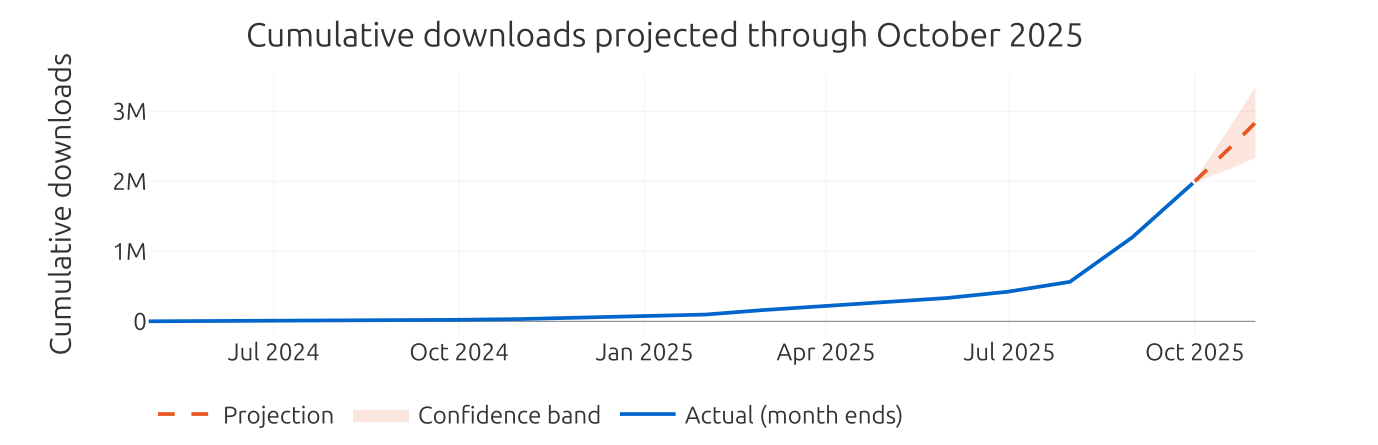

Top packages this month

PACKAGE	TYPE	DOWNLOADS	MOM
dotnet-runtime-9.0	runtime	87,435	+49.0%
dotnet-host-9.0	host	87,109	+49.1%
dotnet-hostfxr-9.0	hostfxr	86,953	+49.3%
aspnetcore-runtime-9.0	aspnetcore-runtime	85,599	+51.1%
aspnetcore-targeting-pack-9.0	targeting-pack	50,996	+8.1%
dotnet-apphost-pack-9.0	apphost-pack	50,950	+8.0%
dotnet-targeting-pack-9.0	targeting-pack	50,878	+7.9%
netstandard-targeting-pack-2.1-9.0	targeting-pack	49,522	+8.0%
dotnet-sdk-9.0	sdk	49,464	+8.2%
dotnet-templates-9.0	other	49,241	+7.9%

SDK downloads indicate development and build environments; runtime-only downloads indicate deployment targets. Neither is a count of people.

Trajectory & watch items

Where the trend is heading, and what needs a human explanation.

Projection fits the daily rate of the 60 days to 2025-09-30 and extrapolates linearly; it assumes no new release events. Indicative total for October 2025: 865,155 downloads.

Momentum by version

VERSION	DOWNLOADS IN MONTH	LAST 7D VS PRIOR 7D	LAST 30D VS PRIOR 30D	TREND (DL/DAY²)	EST. HALF-LIFE
dotnet6	66,892	+27.0%	-4.8%	22.2	growing / stable
dotnet7	8,846	+7.6%	-8.0%	-1.1	158 days
dotnet9	697,114	+0.3%	+29.6%	-78.0	growing / stable

Windows end on 2025-09-30. Days without data are treated as zero inside these windows, so a collection gap depresses the figures.

Days needing explanation

DATE	DOWNLOADS	ABOVE MONTH MEAN
2025-09-10	51,831	2.9σ
2025-09-11	45,270	2.2σ

Days more than two standard deviations above the month's mean. Common causes are release publications, mirror synchronisation and CI bursts.

Data coverage

MEASURE	VALUE
Days in month	30
Days expected in window	30
Days with download counts	30
Coverage	100.0%
Missing days	0
Gaps	none
Month fully elapsed in dataset	yes
Publications active in month	261
Publications first seen in month	126
Collector last run	2026-07-31

A publication is one binary package version in one series and architecture. A burst of first-seen publications usually follows a release upload or a resumed collection window, not a change in demand.

Methodology & limitations

Figures count package downloads recorded by Launchpad for the dotnet/backports PPA only.

The primary Ubuntu archive publishes no download telemetry, so packages installed from it are not represented here. This report is a directional indicator, not total .NET usage on Ubuntu.

Downloads are not users. CI/CD pipelines, container image builds, mirrors and repeated installations all inflate counts, and one developer may generate many downloads.

Counts are deduplicated per publication and day, keeping the maximum value reported by Launchpad; recent days may still rise as Launchpad reporting settles.

Debug-symbol packages are excluded from every figure in this report.

No data is collected for any other programming language, so this report makes no cross-language comparison.

Source: Launchpad download counts for Backports PPA. Collected by scripts/collect.py; figures reproducible from data/downloads.json for month 2025-09.
