

.NET on Ubuntu — April 2024

Package download statistics for the dotnet/backports PPA on Launchpad.

Reporting period	April 2024 (2024-04-01 to 2024-04-30, UTC)
Data window	2024-04-26 to 2026-07-31
Generated	2026-08-03 00:39:43 UTC
Origin	Backports PPA
Scope	dotnet6, dotnet7, dotnet8, dotnet9, dotnet10 · all Ubuntu series and architectures · debug-symbol packages excluded

At a glance

Headline volume and the month's most material movements.

 **Insufficient data.** Only 3 of 30 days carry download counts (10%). Totals and comparisons on this page are not representative of the month.

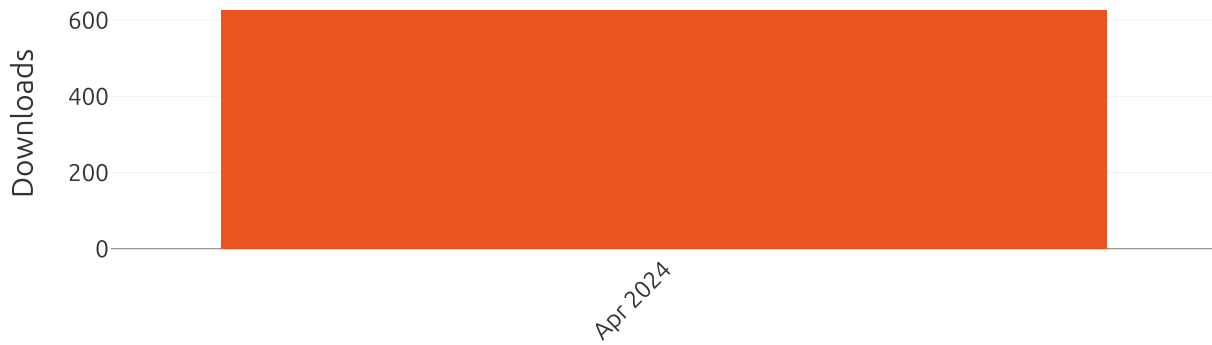

Downloads in month 625 vs March 2024: n/a	Average per day 208 over 3 days with data	Year on year n/a no comparable month	Peak day 442 2024-04-27
Leading version dotnet6 68.5% of the month · 2 active versions	Newest version share 31.5% dotnet7 · n/a	SDK per runtime download 0.49 developer-intent proxy · n/a	Lifetime to month end 625 cumulative since 2024-04-26

Key findings

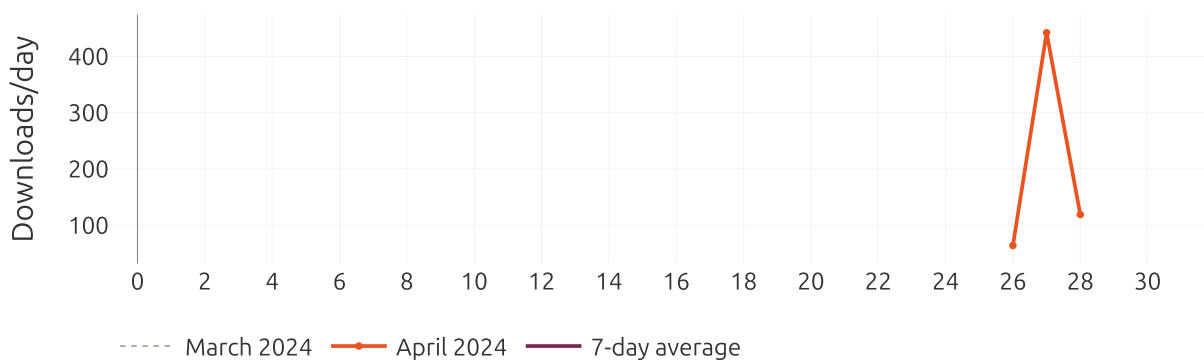

Data covers 3 of 30 days (10%); 27 day(s) are missing, so monthly totals understate actual volume and month-on-month comparisons are not like for like.

625 downloads in April 2024 (208/day).

Monthly downloads, last 1 months

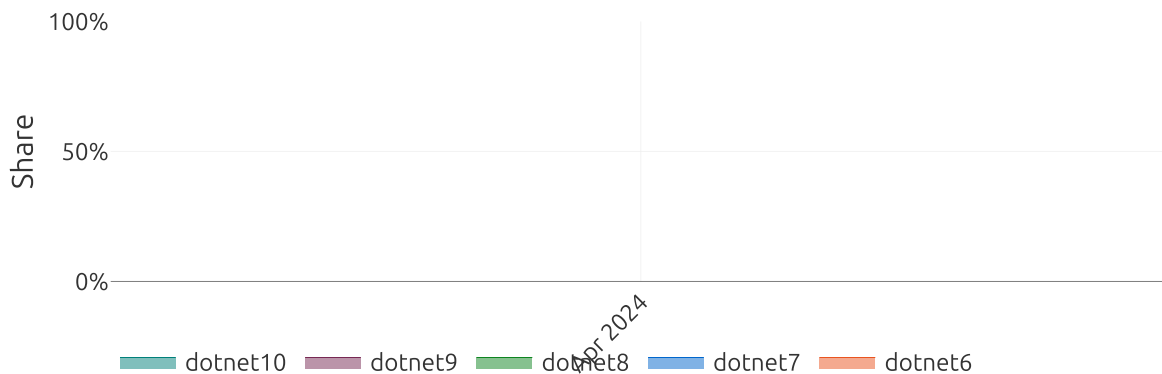

Daily downloads through the month (day of month on x axis)

Composition & adoption

Which .NET releases, Ubuntu series and architectures the downloads came from, and how the mix moved.

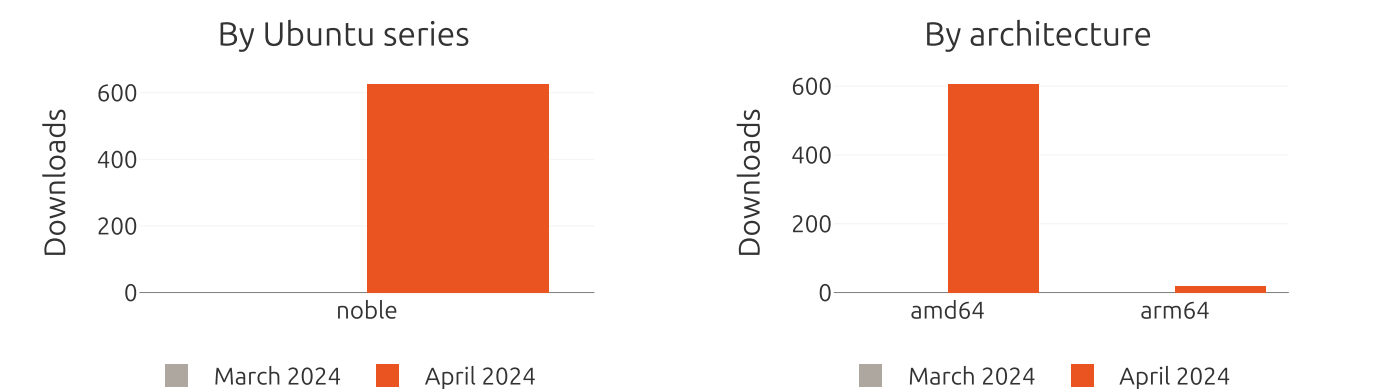

Share of downloads by .NET version

Version detail

VERSION	DOWNLOADS	SHARE	MOM	SHARE CHANGE
dotnet6	428	68.5%	n/a	n/a
dotnet7	197	31.5%	n/a	n/a

Share change is in percentage points against March 2024.

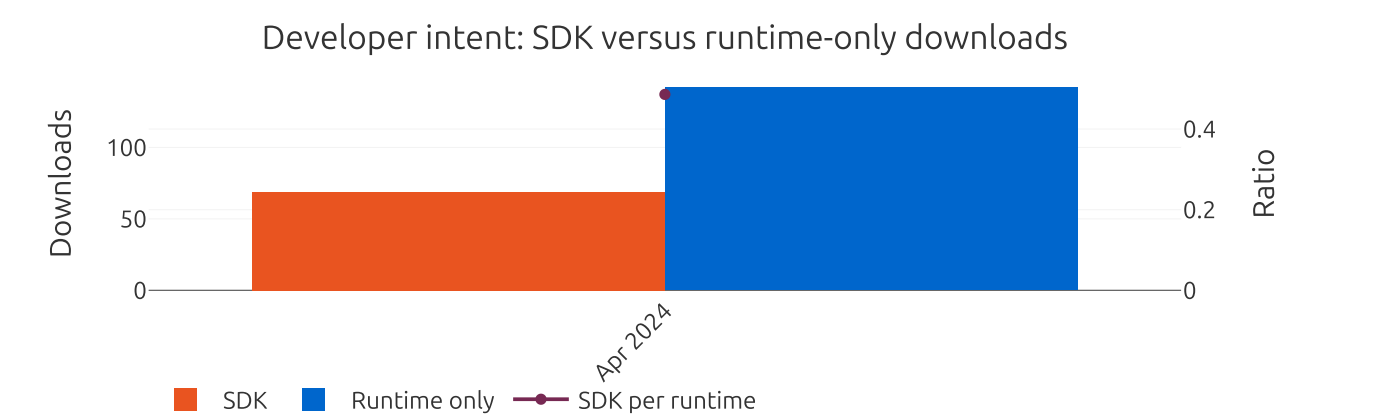

Ubuntu series detail

VALUE	DOWNLOADS	SHARE	MARCH 2024	MOM
noble	625	100.0%	0	n/a

LTS series (jammy (22.04 LTS), noble (24.04 LTS)) account for 100.0% of the month, n/a on March 2024.

Architecture detail

VALUE	DOWNLOADS	SHARE	MARCH 2024	MOM
amd64	605	96.8%	0	n/a
arm64	20	3.2%	0	n/a

Top packages this month

PACKAGE	TYPE	DOWNLOADS	MOM
dotnet-hostfxr-6.0	hostfxr	49	n/a
dotnet-runtime-6.0	runtime	49	n/a
aspnetcore-runtime-6.0	aspnetcore-runtime	47	n/a
aspnetcore-targeting-pack-6.0	targeting-pack	46	n/a
dotnet-apphost-pack-6.0	apphost-pack	46	n/a
dotnet-sdk-6.0	sdk	46	n/a
dotnet-targeting-pack-6.0	targeting-pack	45	n/a
dotnet-templates-6.0	other	45	n/a
dotnet-host	host	27	n/a
netstandard-targeting-pack-2.1	targeting-pack	25	n/a

SDK downloads indicate development and build environments; runtime-only downloads indicate deployment targets. Neither is a count of people.

Trajectory & watch items

Where the trend is heading, and what needs a human explanation.

Momentum by version

VERSION	DOWNLOADS IN MONTH	LAST 7D VS PRIOR 7D	LAST 30D VS PRIOR 30D	TREND (DL/DAY²)	EST. HALF-LIFE
dotnet6	428	n/a	n/a	2.2	growing / stable
dotnet7	197	n/a	n/a	1.0	growing / stable

Windows end on 2024-04-30. Days without data are treated as zero inside these windows, so a collection gap depresses the figures.

Data coverage

MEASURE	VALUE
Days in month	30
Days expected in window	30
Days with download counts	3
Coverage	10.0%
Missing days	27
Gaps	2024-04-01 to 2024-04-25, 2024-04-29 to 2024-04-30
Month fully elapsed in dataset	yes
Publications active in month	32
Publications first seen in month	32
Collector last run	2026-07-31

A publication is one binary package version in one series and architecture. A burst of first-seen publications usually follows a release upload or a resumed collection window, not a change in demand.

Methodology & limitations

Figures count package downloads recorded by Launchpad for the dotnet/backports PPA only.

The primary Ubuntu archive publishes no download telemetry, so packages installed from it are not represented here. This report is a directional indicator, not total .NET usage on Ubuntu.

Downloads are not users. CI/CD pipelines, container image builds, mirrors and repeated installations all inflate counts, and one developer may generate many downloads.

Counts are deduplicated per publication and day, keeping the maximum value reported by Launchpad; recent days may still rise as Launchpad reporting settles.

Debug-symbol packages are excluded from every figure in this report.

No data is collected for any other programming language, so this report makes no cross-language comparison.

Source: Launchpad download counts for Backports PPA. Collected by scripts/collect.py; figures reproducible from data/downloads.json for month 2024-04.
