

.NET on Ubuntu — December 2025

Package download statistics for the dotnet/backports PPA on Launchpad.

Reporting period	December 2025 (2025-12-01 to 2025-12-31, UTC)
Data window	2024-04-26 to 2026-07-31
Generated	2026-08-03 00:40:42 UTC
Origin	Backports PPA
Scope	dotnet6, dotnet7, dotnet8, dotnet9, dotnet10 · all Ubuntu series and architectures · debug-symbol packages excluded

At a glance

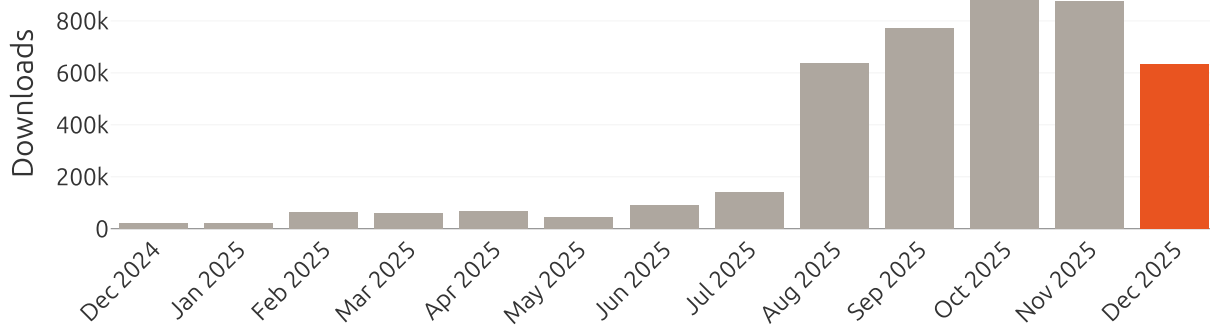

Headline volume and the month's most material movements.

Downloads in month 634,527 vs November 2025: -27.5%	Average per day 20,469 over 31 days with data	Year on year 30× vs December 2024 (20,879)	Peak day 32,620 2025-12-03
Leading version dotnet9 81.5% of the month · 5 active versions	Newest version share 11.2% dotnet10 · +8.1pp	SDK per runtime download 0.53 developer-intent proxy · -0.8%	Lifetime to month end 4,400,526 cumulative since 2024-04-26

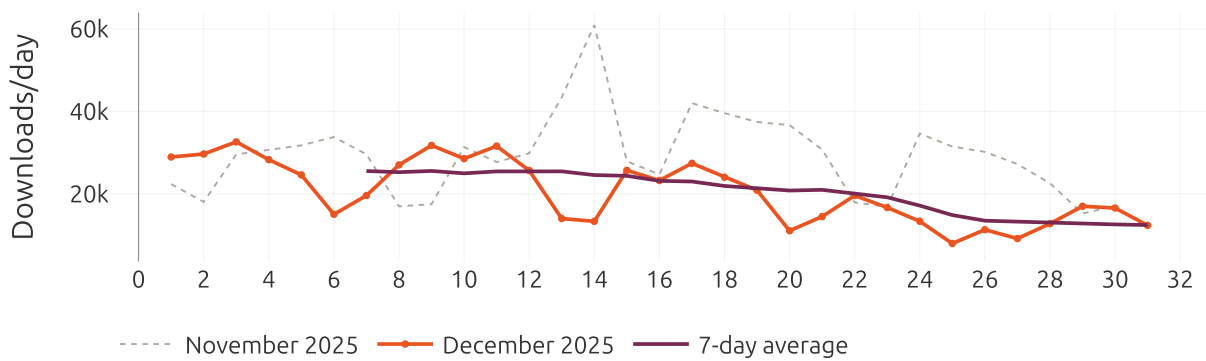

Key findings

634,527 downloads in December 2025 (20,469/day), down -27.5% against November 2025. Year on year the month is 30× higher than December 2024.
Adoption of dotnet10 is accelerating: 11.2% of the month's volume, +8.1pp on November 2025 (+157.4% in absolute terms).
dotnet9 is being displaced: 81.5% of volume, -8.1pp on November 2025 — consistent with migration to newer releases.
dotnet9 remains the most downloaded release at 81.5% of the month, across 5 active .NET versions.
Every runtime-only download came with 0.53 SDK downloads (86,255 SDK vs 163,459 runtime) — a proxy for developer-side rather than deployment-side pull.

Monthly downloads, last 13 months

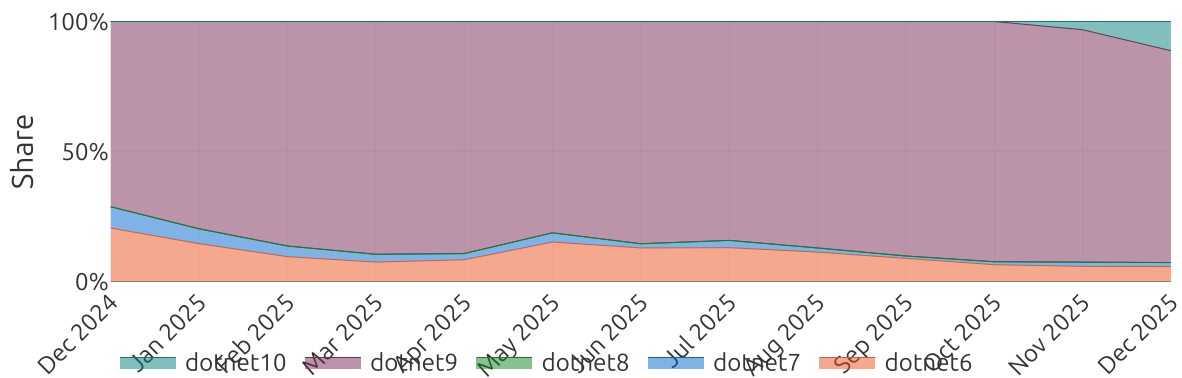

Daily downloads through the month (day of month on x axis)

Composition & adoption

Which .NET releases, Ubuntu series and architectures the downloads came from, and how the mix moved.

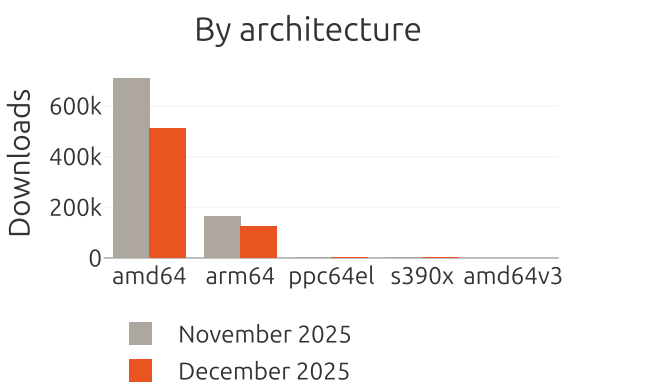

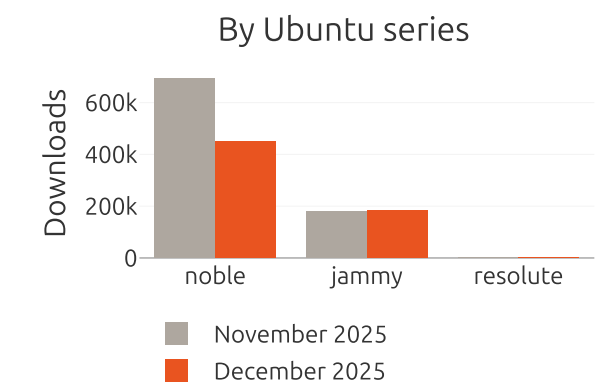

Share of downloads by .NET version

Version detail

VERSION	DOWNLOADS	SHARE	MOM	SHARE CHANGE
dotnet9	516,926	81.5%	-34.1%	-8.1pp
dotnet10	71,361	11.2%	+157.4%	+8.1pp
dotnet6	36,539	5.8%	-28.3%	-0.1pp
dotnet7	9,508	1.5%	-22.3%	+0.1pp
dotnet8	193	0.0%	+138.3%	+0.0pp

Share change is in percentage points against November 2025.

Ubuntu series detail

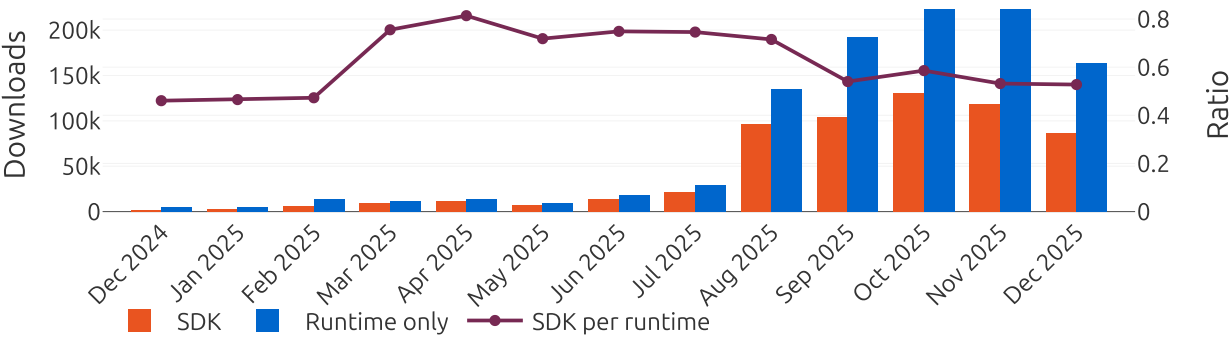

VALUE	DOWNLOADS	SHARE	NOVEMBER 2025	MOM
noble	449,027	70.8%	694,897	-35.4%
jammy	185,109	29.2%	180,570	+2.5%
resolute	391	0.1%	153	+155.6%

LTS series (jammy (22.04 LTS), noble (24.04 LTS)) account for 99.9% of the month, -0.0pp on November 2025.

Architecture detail

VALUE	DOWNLOADS	SHARE	NOVEMBER 2025	MOM
amd64	511,818	80.7%	709,996	-27.9%
arm64	122,357	19.3%	165,423	-26.0%
ppc64el	169	0.0%	101	+67.3%
s390x	167	0.0%	100	+67.0%
amd64v3	16	0.0%	0	n/a

Developer intent: SDK versus runtime-only downloads

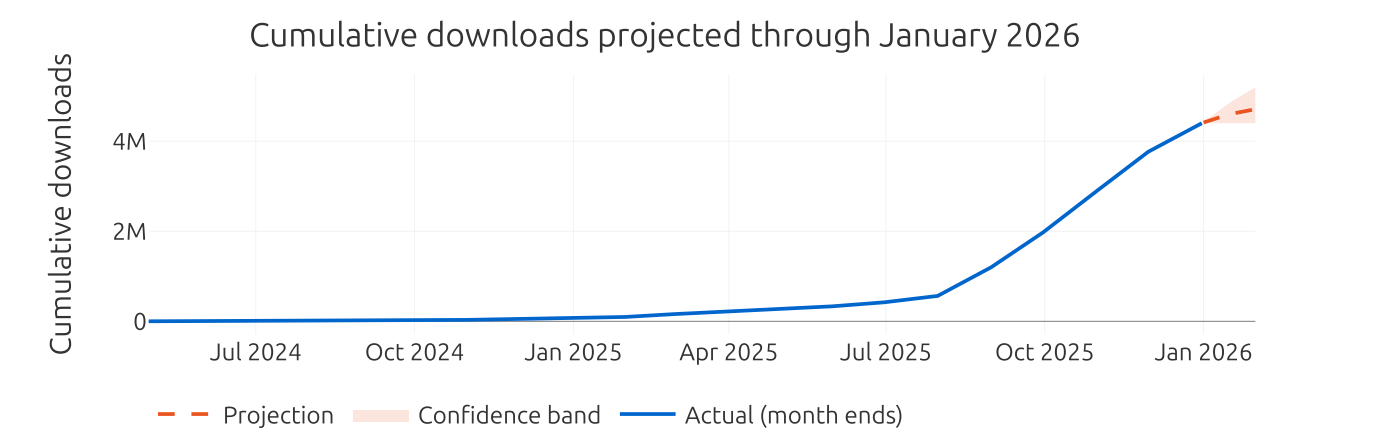

Top packages this month

PACKAGE	TYPE	DOWNLOADS	MOM
dotnet-runtime-9.0	runtime	67,814	-32.4%
dotnet-hostfxr-9.0	hostfxr	67,761	-32.1%
aspnetcore-runtime-9.0	aspnetcore-runtime	66,647	-32.0%
dotnet-host-9.0	host	65,501	-34.2%
aspnetcore-targeting-pack-9.0	targeting-pack	36,025	-35.3%
dotnet-apphost-pack-9.0	apphost-pack	35,976	-35.3%
dotnet-targeting-pack-9.0	targeting-pack	35,826	-35.4%
dotnet-sdk-9.0	sdk	35,454	-35.4%
netstandard-targeting-pack-2.1-9.0	targeting-pack	35,454	-35.5%
dotnet-templates-9.0	other	35,038	-35.0%

SDK downloads indicate development and build environments; runtime-only downloads indicate deployment targets. Neither is a count of people.

Trajectory & watch items

Where the trend is heading, and what needs a human explanation.

Projection fits the daily rate of the 60 days to 2025-12-31 and extrapolates linearly; it assumes no new release events. Indicative total for January 2026: 311,062 downloads.

Momentum by version

VERSION	DOWNLOADS IN MONTH	LAST 7D VS PRIOR 7D	LAST 30D VS PRIOR 30D	TREND (DL/DAY²)	EST. HALF-LIFE
dotnet6	36,539	-41.6%	-31.7%	-18.9	48 days
dotnet7	9,508	-18.9%	-25.6%	-6.1	37 days
dotnet8	193	-48.0%	+138.3%	-0.2	growing / stable
dotnet9	516,926	-22.2%	-37.5%	-544.1	27 days
dotnet10	71,361	-47.8%	+128.0%	-36.1	growing / stable

Windows end on 2025-12-31. Days without data are treated as zero inside these windows, so a collection gap depresses the figures.

Data coverage

MEASURE	VALUE
Days in month	31
Days expected in window	31
Days with download counts	31
Coverage	100.0%
Missing days	0
Gaps	none
Month fully elapsed in dataset	yes
Publications active in month	469
Publications first seen in month	271
Collector last run	2026-07-31

A publication is one binary package version in one series and architecture. A burst of first-seen publications usually follows a release upload or a resumed collection window, not a change in demand.

Methodology & limitations

Figures count package downloads recorded by Launchpad for the dotnet/backports PPA only.

The primary Ubuntu archive publishes no download telemetry, so packages installed from it are not represented here. This report is a directional indicator, not total .NET usage on Ubuntu.

Downloads are not users. CI/CD pipelines, container image builds, mirrors and repeated installations all inflate counts, and one developer may generate many downloads.

Counts are deduplicated per publication and day, keeping the maximum value reported by Launchpad; recent days may still rise as Launchpad reporting settles.

Debug-symbol packages are excluded from every figure in this report.

No data is collected for any other programming language, so this report makes no cross-language comparison.

Source: Launchpad download counts for Backports PPA. Collected by scripts/collect.py; figures reproducible from data/downloads.json for month 2025-12.
